

## MoodiApp

Bayan Naamneh, Sally badarneh, Reem Hawa  
Supervisor: Prof. Joel Lanir

### 1. What is Moodi?

Moodi is a calm emotional logging app for children with high-functioning ASD who find emotions hard to identify and express.

### 2. Problem

Overwhelming emotions

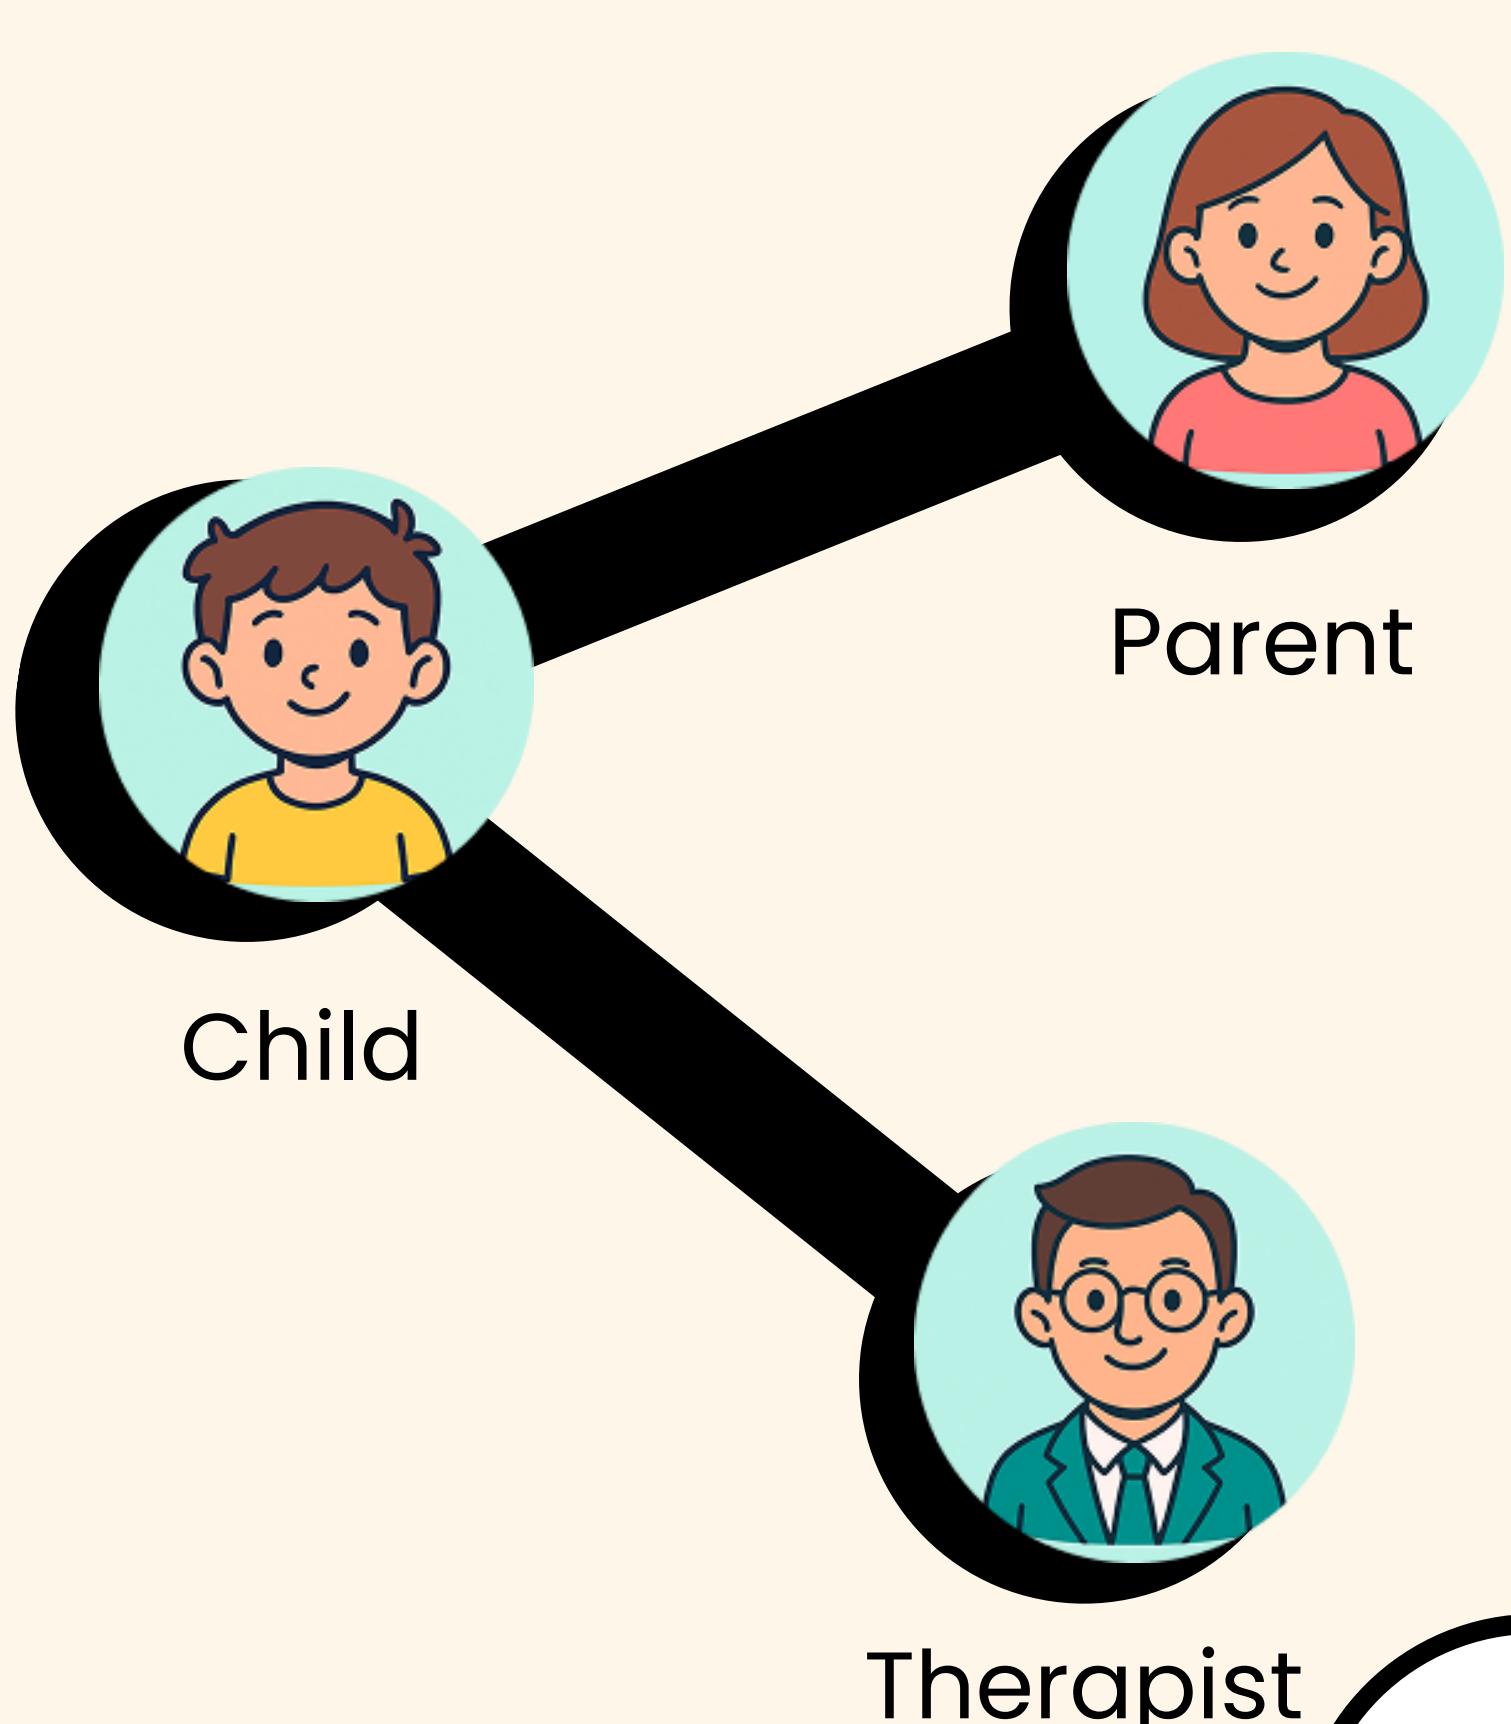

Moments get lost

Care is disconnected

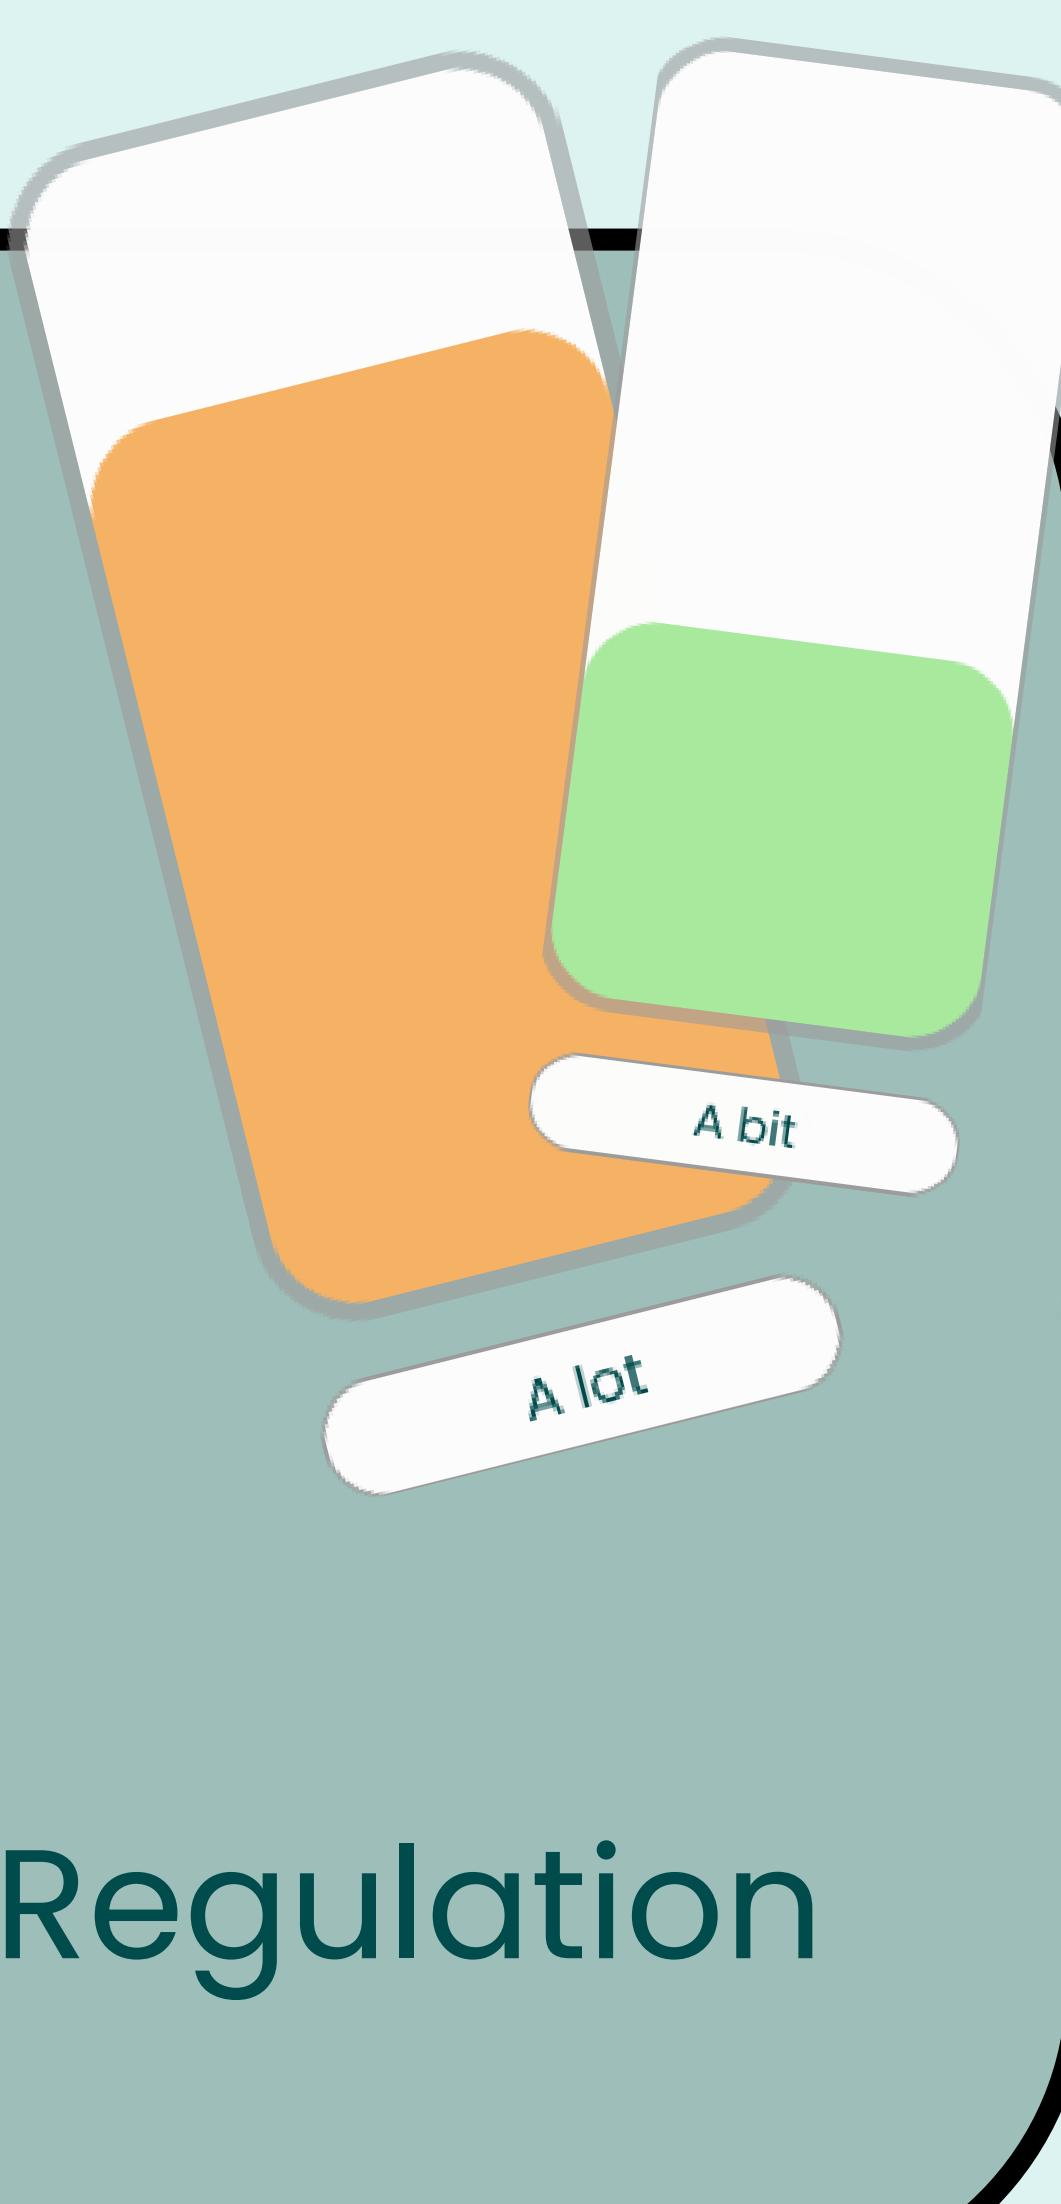

### 3. Target Users

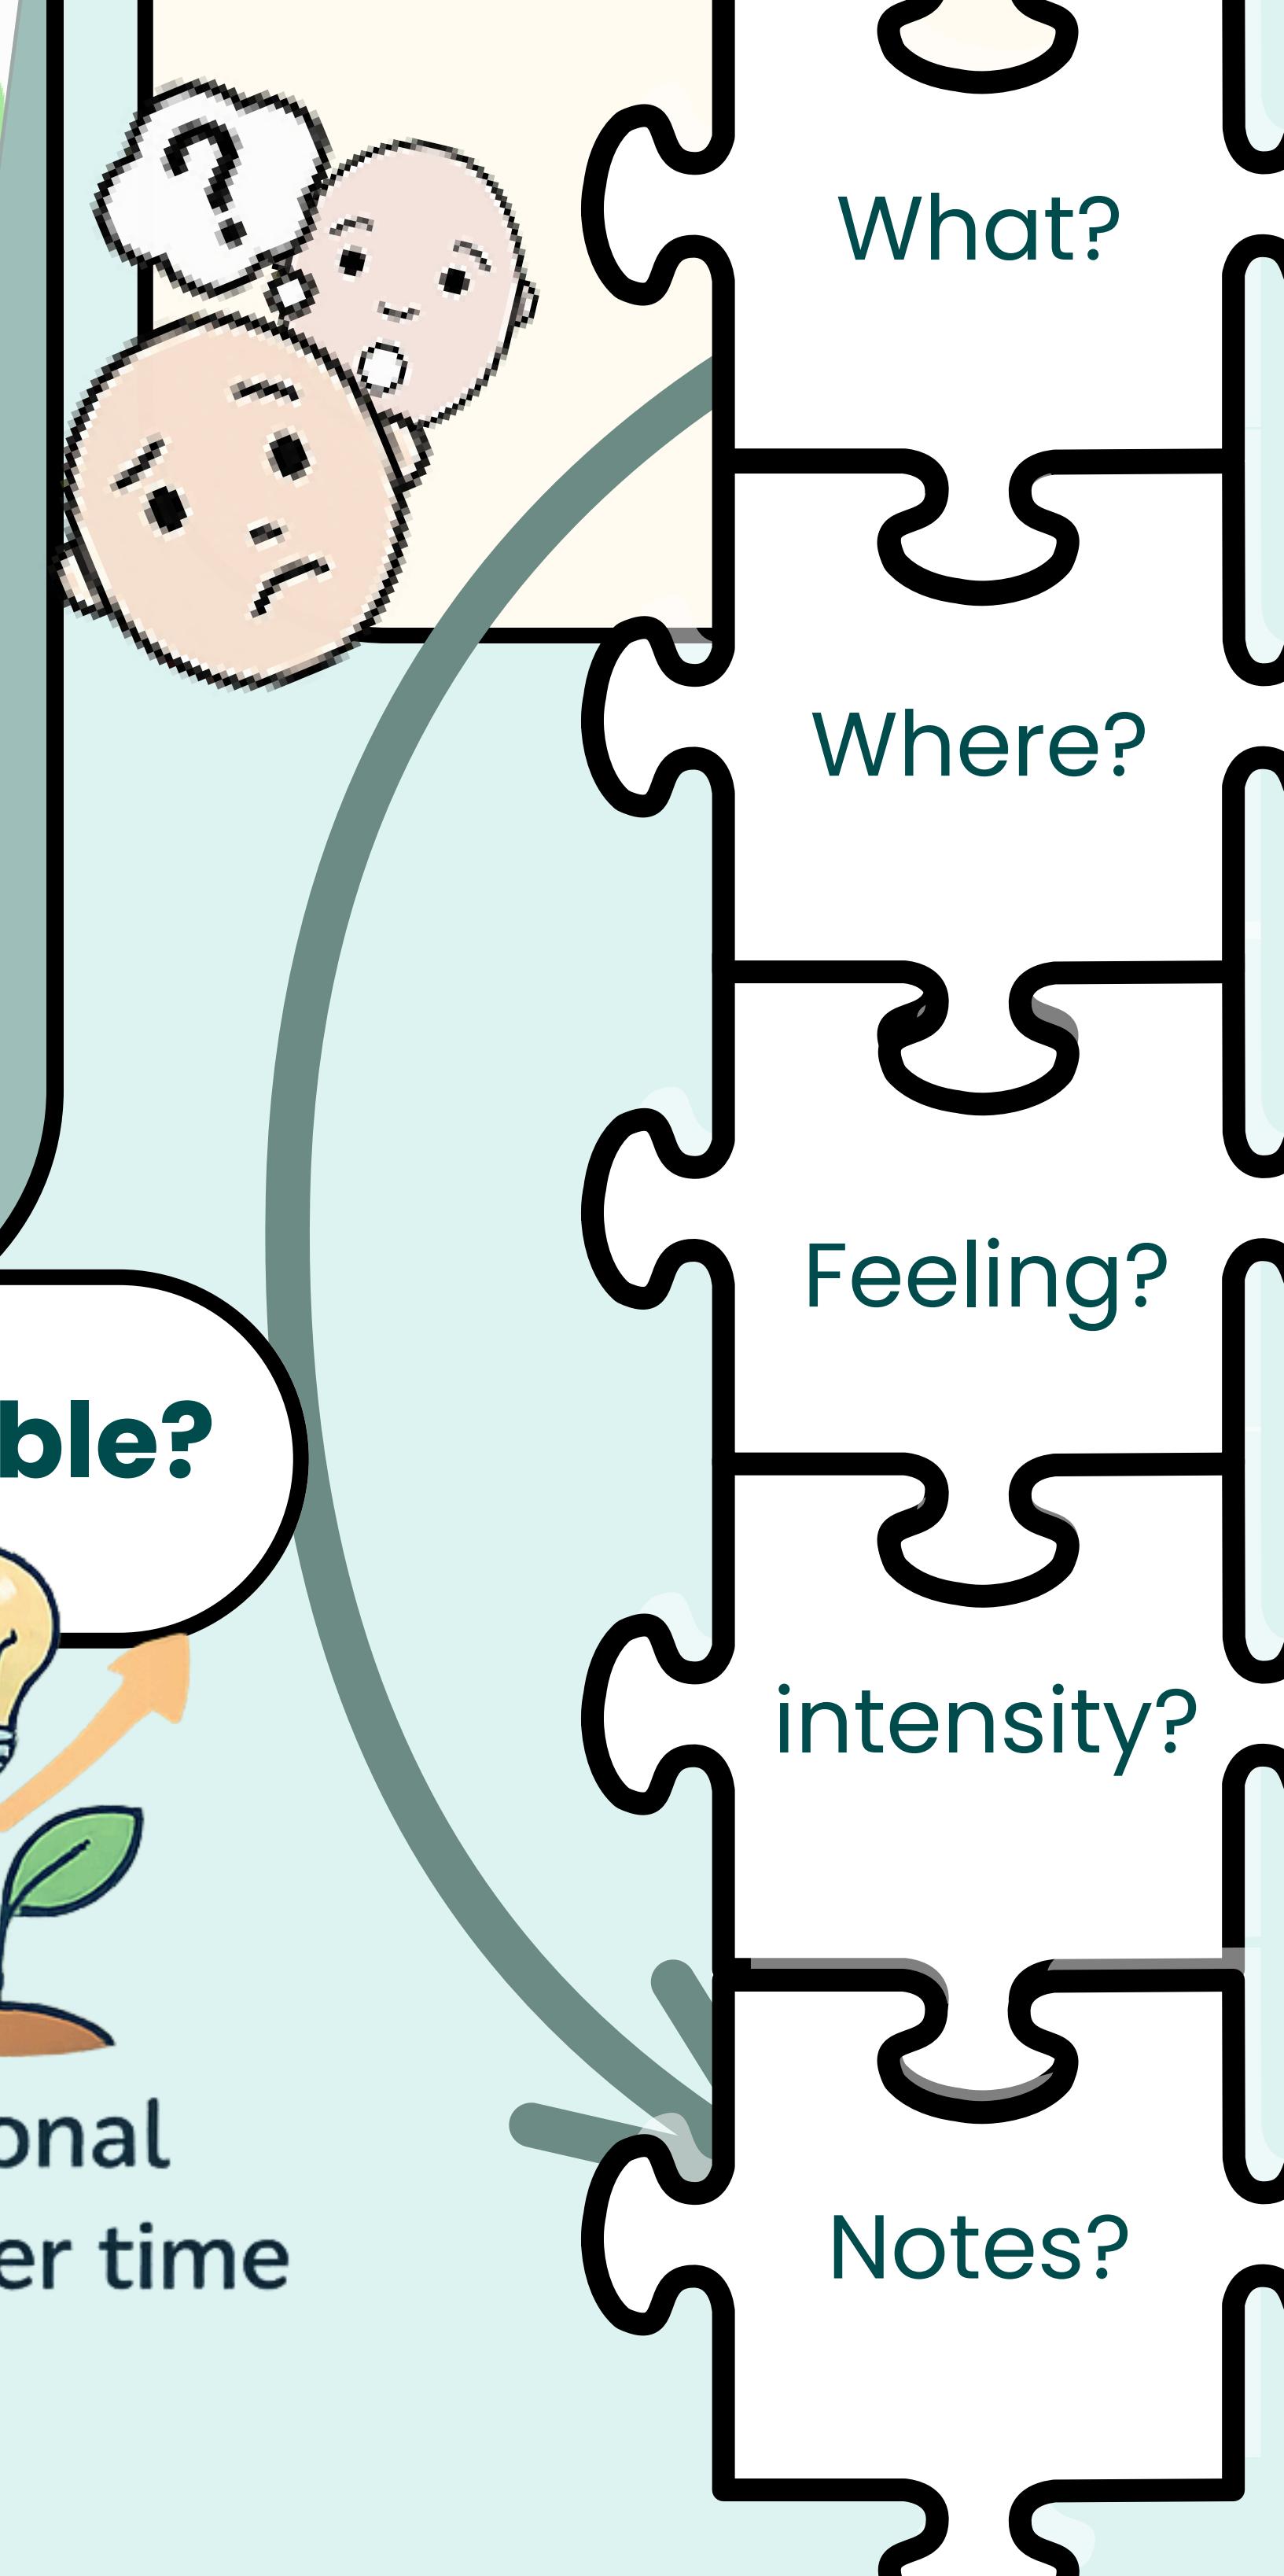

### 4. Core Idea

- Identify emotions
- Express intensity
- Build awareness

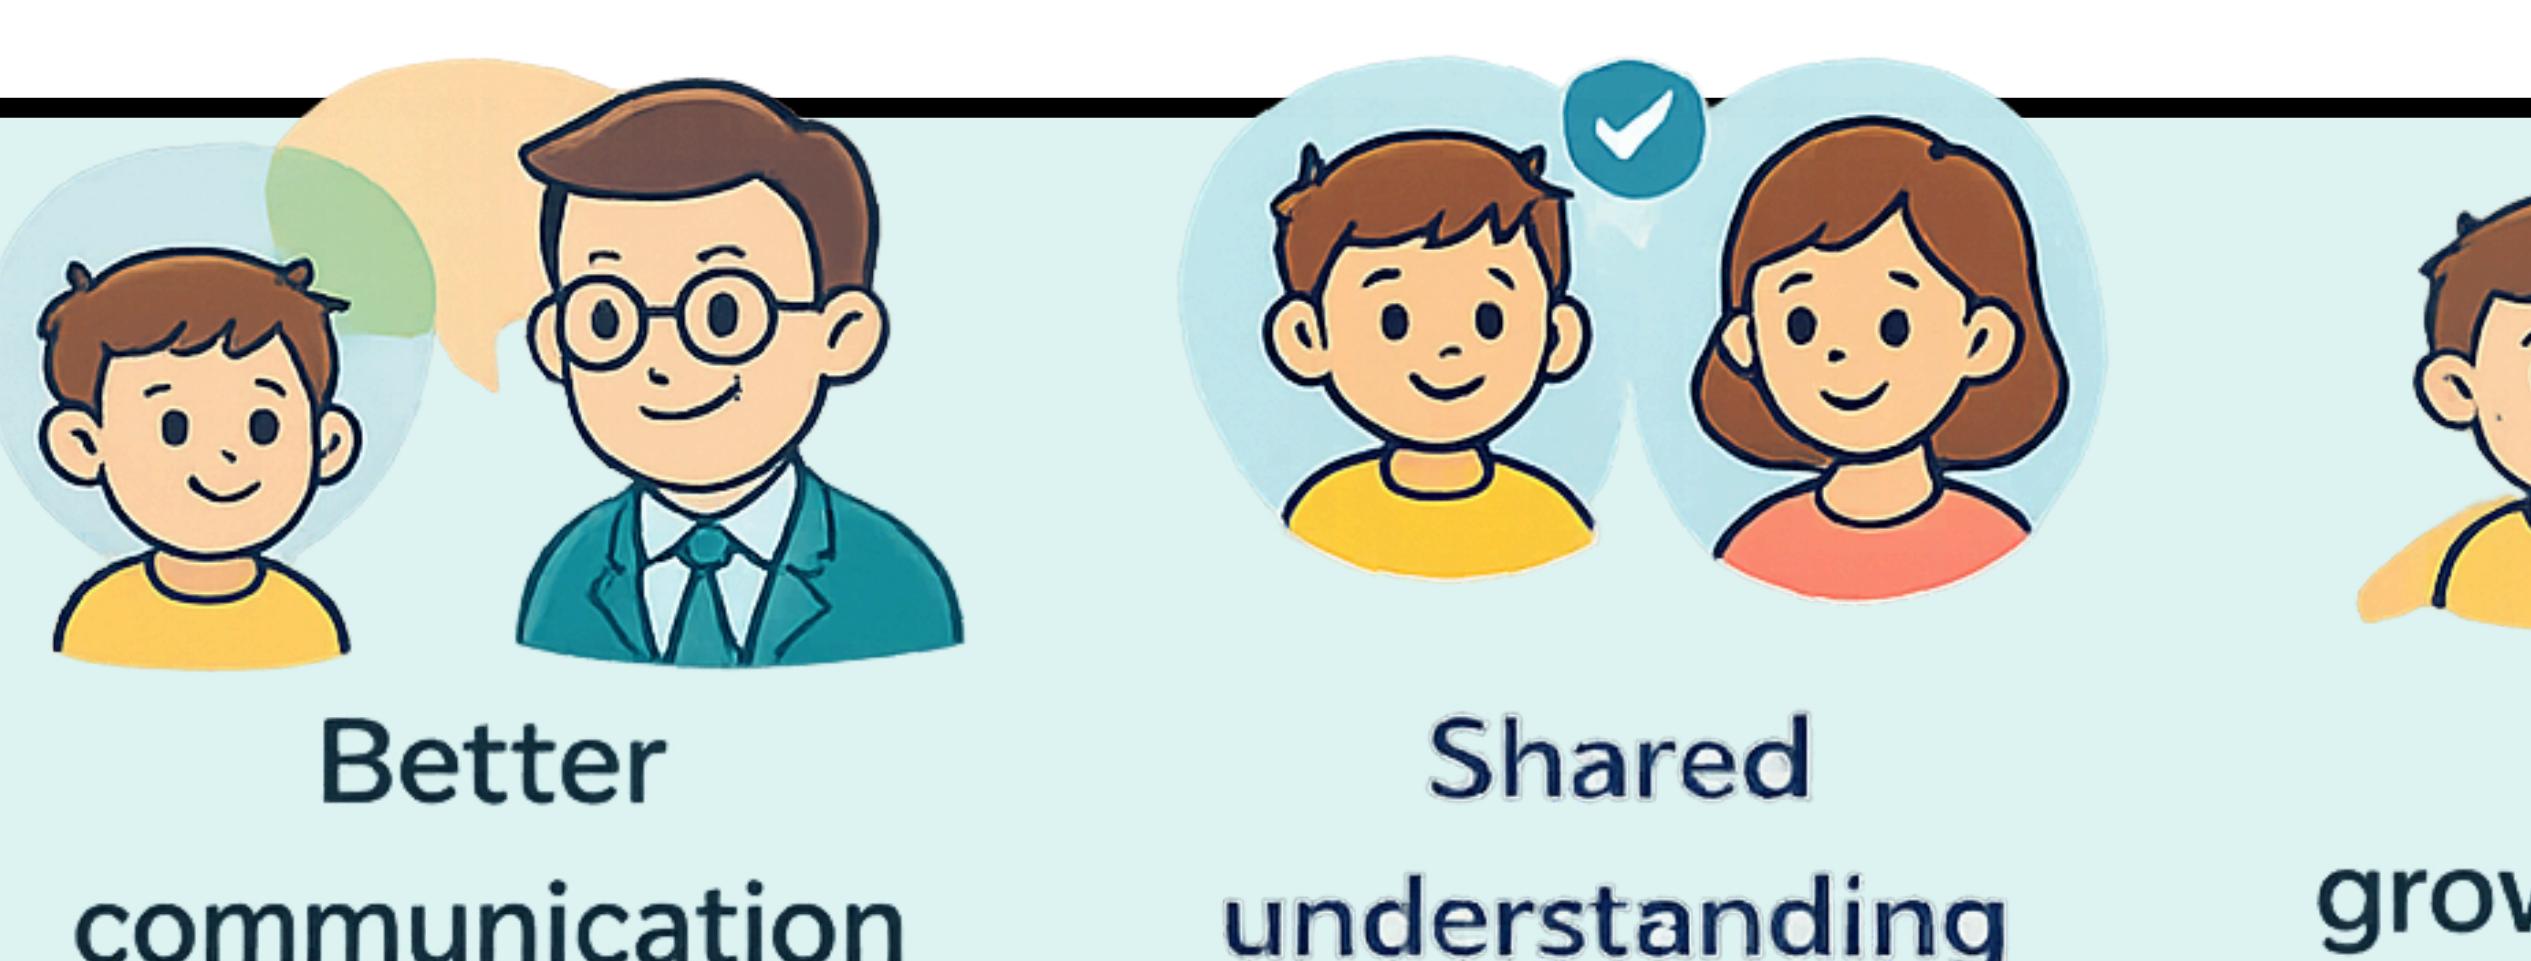

Emotion → Awareness → Regulation

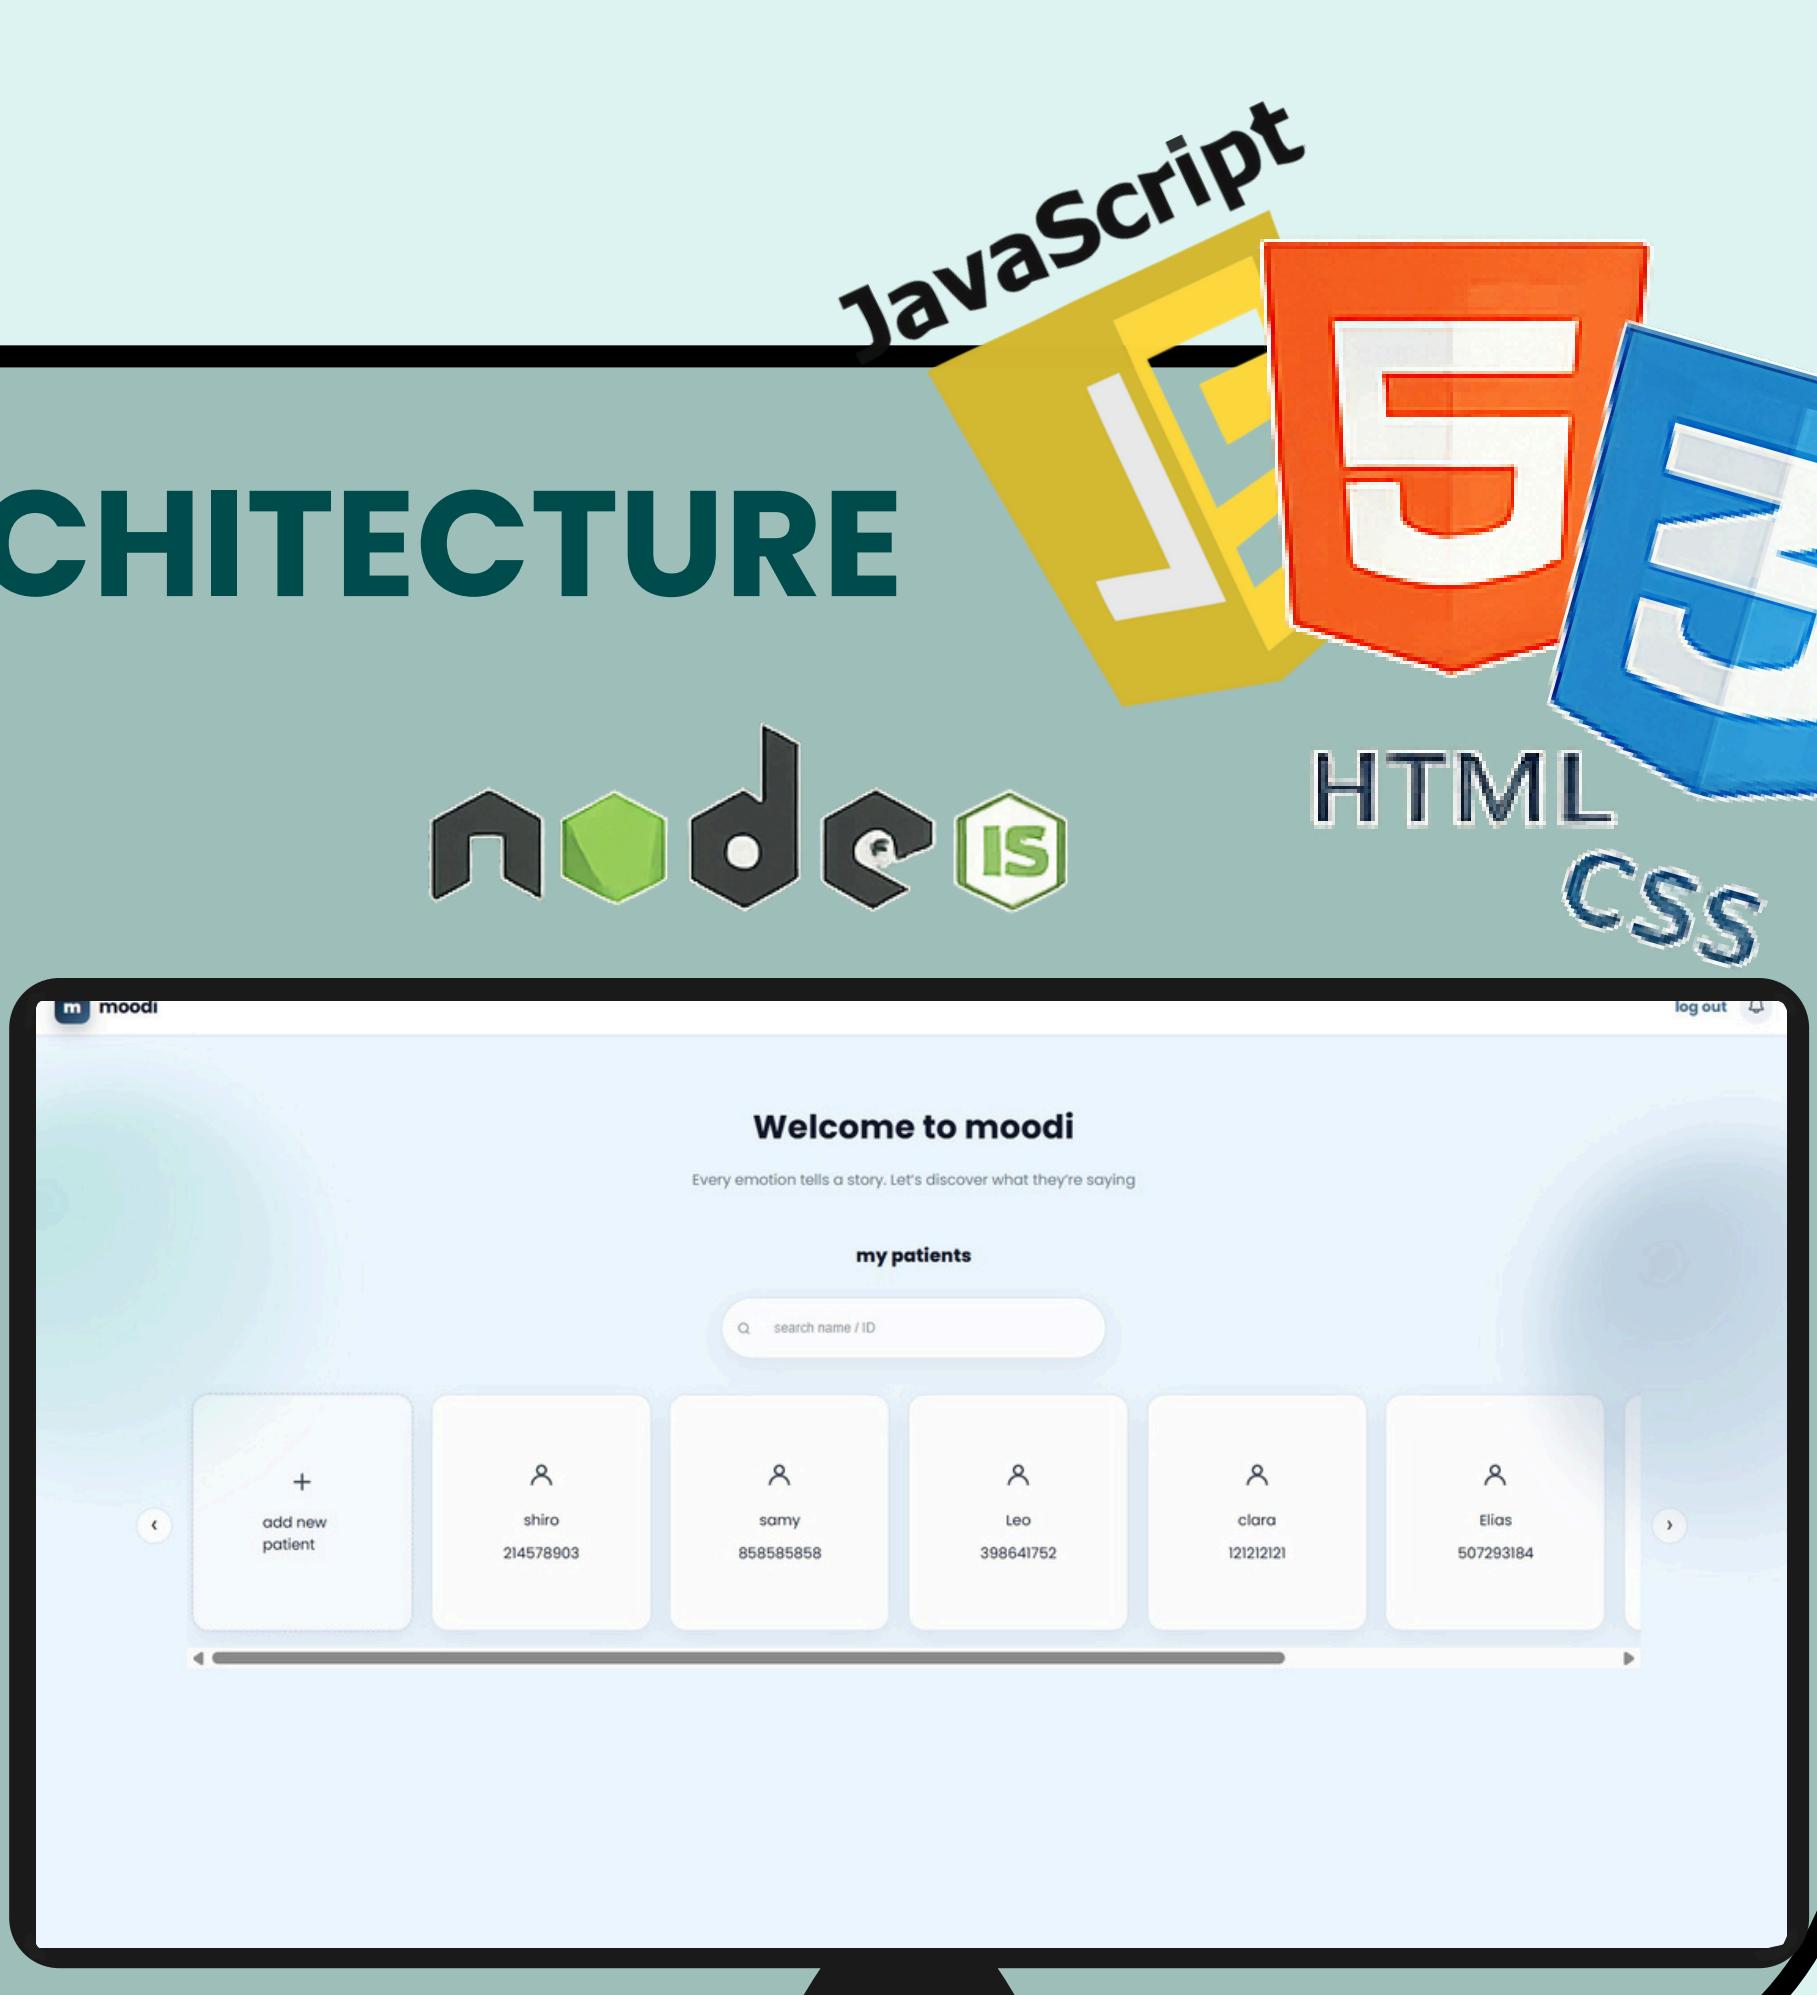

### 5. How?

What changes when emotions are no longer invisible?

### 6. SYSTEM ARCHITECTURE

### 7. CONCLUSION

A calm, visual emotional logging app designed for children with high-functioning ASD. Connecting emotional moments to shared understanding.
